

OM4 Multimode Fiber Optic Pigtails

ZORA's factory-based assembly and mechanical connector polishing systems provide a wide range of fiber optic type connectors to ensure superior performance, interconnectivity and durability. All pigtails are 100% fully tested through standard test procedures.

ZORA Multimode Fiber Optic Pigtails are fusion spliced or mechanically docked to fiber optic cables and are connected using a variety of connector types.

Reference Standard

- ANSI/TIA 568 C.0
- ISO/IEC 11801

Product Features

- 100% end-face inspection and compliant with GR-326-CORE;
- High-quality, machine-polished connectors;
- have consistent low-loss performance;
- has an easily strippable fiber buffer;
- short buffered connector jacket for easy high-density fiber management applications;
- Offers a wide range of connector types: FC, SC, ST, LC, MTRJ, MU and more.

Product Applications

- Splicing of optical fibers by mechanical splice method ;
- Splicing of optical fibers by fusion splicing method;
- Temporary splicing of fiber optic cables.

Technical Specification

Mode type	OM4(50/125μm)
Connector Type	FC, SC, ST, LC, MTRJ, MU, etc.
Number of fibers	1Core
insertion loss	≤0.25dB
return loss	≥ 40dB
operating temperature	-40°C ~ +85°C

Ordering Information

Product Model	Product Name	length	Jacket Color	Jacket Size
	OM4 Multimode Fiber Optic Pigtailes LC	1m	Purple	0.9mm
	OM4 Multimode Fiber Optic Pigtailes SC	1m	Purple	0.9mm
	OM4 Multimode Fiber Optic Pigtailes ST	1m	Purple	0.9mm
