

ZORA PDU Power Outlet(10A)

ZORA PDU power outlet is used in the cabinet of the machine room in line with industrial standards of power distribution equipment, to meet the key equipment in the machine room on the power supply and distribution of safe, stable and reliable use of the requirements of a variety of output configurations and the number of bits can meet the customer's power supply needs for different equipment.

ZORA PDU Power Outlet Features

- 1、 Built-in insulation for 360-degree safety;
- 2、 Sockets are made of industrial grade PC flame retardant material;
- 3、 Provides two-pole overload protection, which can effectively prevent the problems caused by overloading;
- 4、 Standard 1U chassis mounting for easy maintenance.

Technical specification

Structure	
External Dimensions	
Length	484mm
Width	45mm
Height	44mm
Exterior Configuration	

Material	PC Flame Retardant Engineering Plastics
Color	Black
Arts and Crafts	
Inside	Internal module copper parts integrated with stranded copper strips, no soldering and secondary connections
Outside	Integrated molding of faceplate and socket module

Electrical Characteristics	
Rated Current	10A
Rated Voltage	220-250V 50/60HZ
Maximum Power	2500W
Cable Gauge	3*1.5 square wire, wire length 1.5 meters / 2 meters, with national standard 10A plugs
