

ZORA ODF Fiber Optic Patch Panel

ZORA ODF Fiber Optic Patch Panel is designed for fiber optic room, used for fiber optic cable introduction, fixing and protection, fiber optic cable termination and pigtail fusion splicing, users can choose the number of units and flanges according to the actual needs.

ZORA ODF Fiber Optic Patch Panel Features

- 1、 The use of high-quality thickened cold-rolled steel plate, no light delicate, frosted texture, uniform electrostatic surface spraying process;
- 2、 It is suitable for cabinet installation, the distribution frame ear stalls are flexible, convenient for the installation of non-standard dimensions, strong applicability;
- 3、 Configuration of thickened fusion fiber tray, size specification, the use of new ABS material production, high temperature resistance;
- 4、 Latch widening, fingers can completely buckle the lock eye, easy to open without effort;
- 5、 The guide rail upgrade and backplane completely match, effectively avoid breakage during transportation;
- 6、 Into the cable hole redesign, support multi-cable into.

Product Applications

- Suitable for 19-inch standard cabinet installation;
- Telecommunications, Fiber-to-the-Home (FTTH), Local Area Network (LAN), Wide Area Network (WAN), Cable Television (CATV) .
